

ID Credit 1.2 – Green Site Management

The Green Site Management program merits an Innovation in Design point because it goes beyond Green Housekeeping and Integrated Pest Management to also address exterior procedures including Xeriscaping, Snow Removal & Ice Control, and maintenance procedures for walkways, driveways, lighting, parking lots, and roof. Please see pages 128-139. This program even goes beyond what has been deemed acceptable for an ID credit for Exterior Site Management according to the Innovation & Design Credit Catalog published by the USGBC in December of 2007. This document has been uploaded to the document upload section. Please see page 6.
